

# Arch Vacuum Stanchion

for buried vacuum piping system

VACUTECH  
INVENTORS OF THE ARCH SYSTEM  
"The Very Best"

Arch vacuum stanchions create a unique look for any project. Arch stanchions distribute vacuum hoses and can act as a canopy. Stanchion arms place the vacuum hose at the parked vehicle, providing easy access for the user. Vacuum tools attach directly to stanchion, eliminating the need to roll hose. Awnings lace between stanchions and provide shade over the parking area. Arch stanchions have an attached debris separator that removes large debris from entering vacuum piping system. Debris (such as keys, jewelry, pens, pencils, coins, moisture, etc.) will collect in separator and can be retrieved easily. Vacutech stocks standard arch stanchions in a variety of styles and colors, or can build custom arch stanchions to fit your specific needs.

Arches are powder coated to the color of your choice. Many color options are available for awnings, vacuum hoses, and vacuum tools.

Draw Attention to Your Vacuum Area

Vacutech is proud to implement the creative designs and requests of each customer. From the smallest job to a complex vacuum system, we will work closely with you to make sure your needs are met.

Here you will find the components of our Vacuum Arch Stanchion that make any project unique.

Fuel City Wash, Dallas, TX

Awning Option

awnings are custom made to fit each parking space. Typical awnings are made of coolaroo or weblon material. Steel awnings are also available in a wide variety of powder-coat colors.

Coolaroo Material Colors

Vacuum Tools

Vacutech stocks a variety of different vacuum tools and hangers for any application.

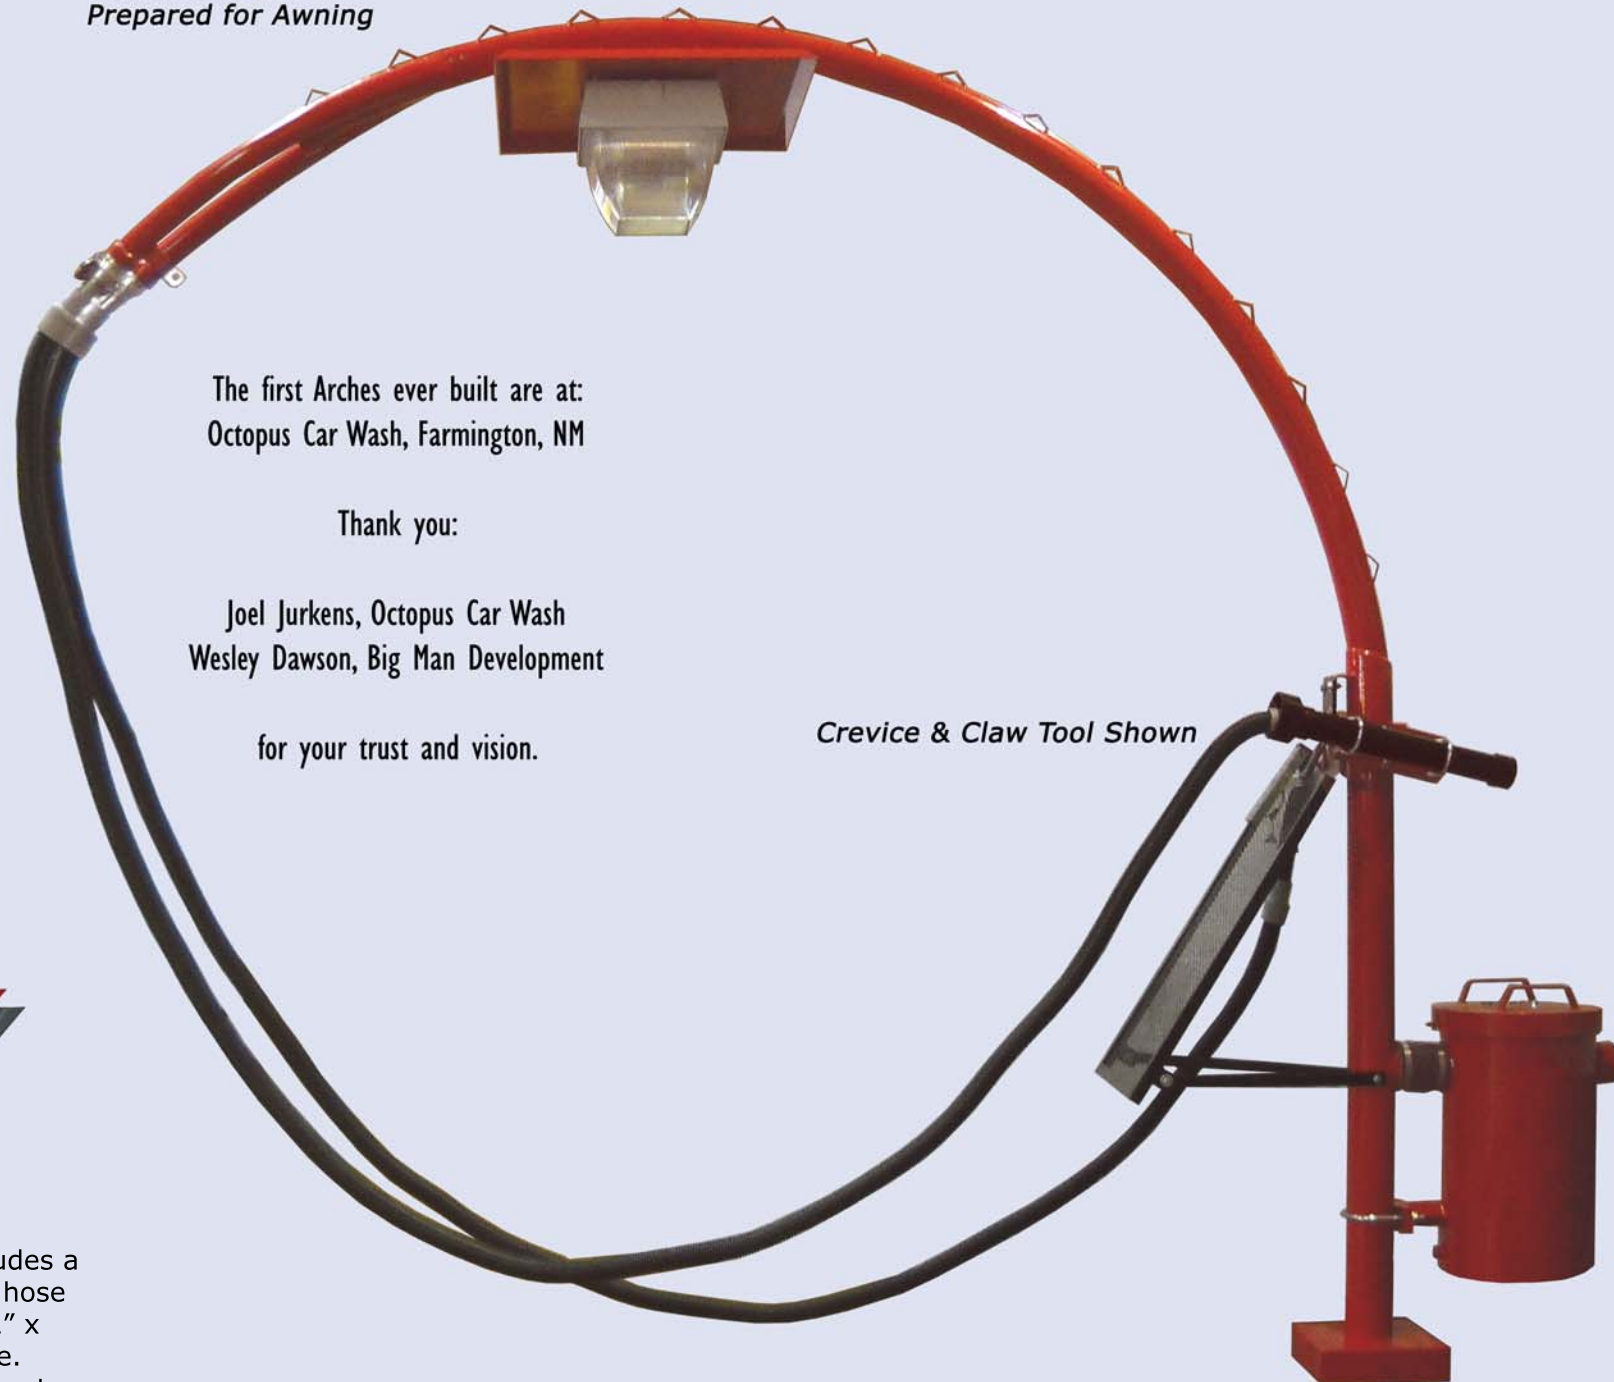

Vacuum Hose

Our typical Hose Drop Kit includes a 1-1/2" x 1-1/2" x 15' vacuum hose with adapters. Cobra Hoses (2" x 1-1/2" x 20') are also available. Longer hose lengths and different color options are available.

Stanchion Arms  
Prepared for Awning

The first Arches ever built are at:  
Octopus Car Wash, Farmington, NM

Thank you:

Joel Jurkens, Octopus Car Wash  
Wesley Dawson, Big Man Development

for your trust and vision.

Crevice & Claw Tool Shown

Light Canopy Option

(Light fixture not included). Extend the operation hours of your vacuum area with comfortable lighting. Light Bracket Canopy mounts to arms of stanchion and provides a location to mount light fixture. Stanchion is prepared for electrical wiring, with an electrical access door at the base of stanchion. Light fixture not included. Ask us for our suggested low energy, high output light fixture.

Waste Receptacle Option

Waste receptacles may be fit to any side of stanchion. Receptacles are constructed of steel and have a 30 gallon removable polyethylene liner with lid. Waste receptacles are also available freestanding.

Mat Rack Option

Mat Racks are available to attach to each stanchion. Mat racks provide the user with an angled ergonomic surface at a convenient height for vacuuming mats.

Debris Separator (Standard)

Arch stanchions have an attached debris separator that removes large items from entering vacuum piping system. Debris or personal items (such as keys, jewelry, pens, pencils, coins, moisture, etc.) will collect in separator and can be retrieved easily. This separation eliminates clogs in piping system and reduces system maintenance. Each Debris Separator has a drain and a removable lid for convenient cleaning and removal of personal items.
